

108th WPI-IIIS Seminar

Topics on Research Ethics – #3

Research misconduct – Lessons learnt from case studies

Great concern over scientific misconduct has been expressed by both the scientific community and the public at large. In Japan, repeated media coverage in 2014 - 2015 of two incidents, namely the fraudulent data for the antihypertensive drug Diovan marketed by Novartis, and the STAP cell scandal, evoked widespread concern. In my lecture, I will analyze some misconduct cases and summarize lessons learnt from them.

Dr. Toshio Kuroki

WPI Program Director, JSPS

Professor Emeritus, University of Tokyo

Date: **Wednesday, March 22, 2017**

Time: **16:30 – 17:30**

Venue: **1F Auditorium, IIIS Building**

Contact: International Institute for Integrative Sleep Medicine, University of Tsukuba
